Educational Emphasis on Social Responsibility

Zero Hunger (SDG 2)

Azerbaijan University is deeply committed to the principles of social responsibility and human dignity, in line with the United Nations Sustainable Development Goal 2: **Zero Hunger**. We understand that access to sufficient and nutritious food is a fundamental human right and an essential foundation for academic success and well-being.

Campus Support for Students and Staff in Need

At Azerbaijan University, we ensure that **no student or staff member goes hungry due to financial hardship**. As part of our inclusive campus policy:

Every year, approximately 100 students and 10 staff members from low-income backgrounds receive **free daily meals at the university canteen**. This initiative helps

ensure that those facing economic difficulties can maintain a healthy and balanced diet while focusing on their academic and professional responsibilities.

Student-Led Community Outreach

Our students are also actively involved in addressing hunger outside the university:

Once a year, a group of our volunteer students organizes a street outreach initiative, during which they prepare **burgers, snacks,**

and refreshments and distribute them to **homeless individuals** in different parts of the city. This compassionate activity not only provides temporary relief to those in need but also raises awareness among students about food insecurity and the importance of empathy and action.

Educational Emphasis on Social Responsibility

Through seminars, projects, and extracurricular initiatives, Azerbaijan University encourages students to explore the wider social and economic factors contributing to hunger. We aim to instill a lasting sense of responsibility in future leaders and professionals by connecting academic learning with real-world impact.

Azerbaijan University's efforts under SDG 2 reflect our belief that **no one should be left behind - especially when it comes to basic needs like food**. Through a combination of institutional support and student-led outreach, we continue to promote food security, social equity, and community solidarity both on and off campus.
