

# REPORT ON SDG 15: LIFE ON LAND

Students at Azerbaijan University regularly organize tree planting events in urban areas and nearby forests, helping to combat deforestation, improve air quality, and promote biodiversity in local ecosystems. The university holds seminars and student-led campaigns focusing on the importance of protecting wildlife and natural habitats, educating the university community on the role of conservation in maintaining a healthy environment.

## Life on Land (SDG 15)

Azerbaijan University is dedicated to supporting Sustainable Development Goal 15: Life on Land by promoting the protection, restoration, and sustainable use of terrestrial ecosystems. The university recognizes the importance of environmental stewardship and integrates this mission into both academic and extracurricular activities.

Students and staff at Azerbaijan University regularly participate in tree planting initiatives, contributing to reforestation and increasing green spaces. These activities not only help combat climate change and soil erosion but also raise awareness about the importance of protecting biodiversity.

As part of its outreach efforts, the university organizes trips to regional areas where students engage with local communities, participate in environmental clean-up projects, and support conservation efforts. These visits often include educational programs about wildlife protection and the responsible care of animals.

Furthermore, Azerbaijan University encourages respect for animal life through campaigns and seminars that promote the ethical treatment of animals and highlight the threats facing endangered species. Students are also involved in volunteering activities that support shelters and environmental organizations.

By fostering environmental consciousness and active participation in conservation, Azerbaijan University plays an important role in protecting life on land and inspiring future generations to live in harmony with nature.
