

## REPORT ON SDG 9: INDUSTRY, INNOVATION AND INFRASTRUCTURE

Azerbaijan University actively supports the development of industry, innovation, and infrastructure through its research-driven approach, modern facilities, and commitment to technological advancement. The university prioritizes creating an environment where students and faculty can engage in innovative projects, scientific research, and practical solutions that respond to the needs of society and the economy.

### 9 INDUSTRY, INNOVATION AND INFRASTRUCTURE

## Industry, innovation and infrastructure (SDG 9)

Azerbaijan University continually invests in upgrading its infrastructure to meet international standards, including technologically equipped classrooms, laboratories, and research centers. These facilities provide the necessary tools for academic exploration, experimentation, and innovation across various disciplines.

Azerbaijan University has established cooperation with various industries, enabling students to gain valuable hands-on experience through internships and professional training.

These partnerships help students bridge the gap between academic knowledge and practical skills, preparing them for careers in diverse fields. Azerbaijan University fosters innovation by encouraging students and faculty to engage in cutting-edge research and development projects, particularly in areas related to technology, engineering, and sustainable infrastructure.

In addition to industrial connections, the university also organizes educational visits to museums, cultural centers, and innovation hubs, further enriching the learning experience and fostering creativity and critical thinking.

Through these efforts and collaborations, Azerbaijan University strengthens its role in promoting sustainable industrial growth, technological innovation, and the development of modern infrastructure aligned with global standards.
